Quality Policy

Northvolt's mission is to enable the future of energy. We're building the world's greenest battery in a safe environment, passionately working towards zero defects, zero waste and zero safety incidents.

Every aspect of what we do ensures going beyond customer expectation and satisfaction.

Our guiding principles rest on solid values.

Bold

- + We challenge the status quo by relentlessly leveraging industry best standards and using facts, data and technology
- + We push the known boundaries and embrace new technology to reach the next level of reliability and performance

Passionate

- + We actively seek feedback from our customers to become their most reliable and exciting partner
- + We take responsibility and passionately deliver the best performance to the highest standards

Excellent

- + We build excellence through innovative prototyping, learning quickly to drive fast-paced improvements
- + We seek new knowledge through analyzing data and challenging opinions
- + We characterize every problem with measurable objectives
- + We constantly strive to reduce variability in all our processes until we reach excellence

We have a strong commitment amongst all employees to never compromise on safety, compliance or quality. Our ethical standards are the highest externally and internally.

At Northvolt, we will always do what it takes to achieve our highest quality ambition.

Peter Carlsson, CEO
